📍 Ahmedabad — 📞 +91 97242 71925 — ✉ kanojiya23smit@gmail.com — 🔗 LinkedIn

iOS Developer with **4 years** of experience delivering high-performance, scalable applications using **Swift, SwiftUI**, and modern iOS frameworks. Proven expertise in building **networking and device management applications** for WiFi routers, 5G devices, and surveillance systems, along with architecting modular codebases and deploying production-grade solutions on the App Store. Adept at Agile collaboration, cross-functional teamwork, and performance optimization to enhance user experience. Also experienced in **Flutter** for cross-platform development.

Experience

VVDN Technologies

June 2022 – Present

Sr. iOS Developer

- Developed and maintained **production-grade iOS applications for networking and connected devices**, including WiFi routers, 5G FWA devices, and mobile-based device management solutions.
- Contributed to applications used by **thousands of users** in real-world networking and surveillance environments.
- Designed and optimized **device onboarding flows** (QR/IMEI-based setup, guided installation), reducing setup complexity and improving user experience.
- Built high-performance and responsive UI using **Swift, SwiftUI, Combine, and Grand Central Dispatch (GCD)**, enabling smooth real-time interaction with connected devices.
- Integrated and consumed **RESTful APIs** for features such as WiFi configuration, signal monitoring, and device management dashboards.
- Debugged and resolved **production issues** using analytics and session replay tools (Optimizely, Glassbox), improving application stability and reducing customer-reported issues.
- Contributed to **video surveillance and camera-based systems** by working with ONVIF protocols, RTSP streaming, and multi-device camera workflows.
- Managed **end-to-end release cycles** using TestFlight and App Store Connect, ensuring stable production deployments.
- Collaborated with **backend, firmware, QA, and product teams** to deliver scalable and user-focused solutions aligned with real-world device usage.
- Actively participated in **Agile development processes**, ensuring timely delivery and continuous improvement.

Projects

NETGEAR WiFi Router & Mesh Management Apps (Nighthawk, Orbi)

- Investigated and resolved **customer-reported production issues** using analytics and session replay tools such as **Optimizely, Glassbox, and Airship**.
- Redesigned **onboarding UI flows** based on real user session analysis, reducing friction and contributing to an **18% reduction in support tickets**.
- Debugged and resolved critical issues in **production releases**, improving stability and reducing crash/user friction.
- Collaborated with **backend, QA, and support teams** to triage issues and deliver fixes in **weekly release cycles**.

Inseego Device Installation & Management (Inseego Mobile App)

- Implemented and enhanced **UI/UX flows** for installation and management of **5G FWA routers and mobile hotspots** for the **iOS platform**.
- Redesigned onboarding experience including secure **QR/IMEI-based device pairing**, improving usability and reducing setup complexity.
- Built responsive UI components for features such as **signal strength visualization, Wi-Fi controls**, and device management dashboards integrated with **REST APIs**.
- Collaborated with **UX designers, QA, and backend teams** to deliver consistent and production-ready user experiences.
- Contributed to improving installation flow, helping reduce overall setup time by **25%** through optimized UI design and user guidance.

Johnson Controls — Video Surveillance System (ConnectAlarm)

- Developed a cross-platform VMS using Flutter to manage multi-vendor IP cameras via industry-standard **ONVIF protocols**, supporting low-latency **RTSP live streaming** and **WS-Discovery**.
- Collaborated with firmware teams to implement **ONVIF Profiles S, T, and G**, enabling standardized video configuration, PTZ control, and remote retrieval of **edge-recorded footage**.
- Implemented key features including **snapshot capture**, real-time motion alerts, and historical playback with **timeline scrubbing** via both local network and **port-forwarded WAN connections**.
- Enhanced application security and performance by implementing **Digest/WS-Security authentication**, optimizing video buffer management to reduce jitter, and enforcing quality through **unit testing and performance optimization**.

- Collaborated with QA and firmware teams to ensure application stability, delivering a reliable cross-platform solution for real-time surveillance use cases.

IP Camera Manager — Mobile & Desktop (Illustra Camera Manager)

- Developed a cross-platform **IP Camera Management** tool in Flutter across **Android, iOS, and Windows**, enabling security profile to discover, configure, and maintain up to **100+ IP cameras** from a single unified codebase.
- Implemented **camera onboarding** using a proprietary **REST API** as the primary protocol with automatic **ONVIF fallback**, ensuring compatibility with both first-party and third-party camera manufacturers via **WS-Discovery**.
- Built a full **commissioning wizard** supporting bulk configuration of security credentials, static IP/DHCP network settings, and multi-stream video profiles (**H.264/H.265**) across multiple cameras simultaneously, with **low-latency RTSP live preview** during setup.
- Developed **manual bulk OTA firmware upgrades** supporting cloud firmware detection, multi-family batch processing, success logging and scalability.
- Collaborated with QA and hardware teams to ensure production stability, delivering **100% compatibility across supported iOS devices**, while actively monitoring **TestFlight releases** and resolving post-release issues.

Skills

Languages: Swift, Dart, Objective-C

Frameworks: UIKit, SwiftUI, Combine, Core Data, Cocoa Touch, XCTest, Firebase, RESTful APIs, Flutter, Push Notifications

Tools: Xcode, Android Studio, SourceTree, Git, TestFlight, App Store Connect, Swift Package Manager (SPM), Instruments

Architectures: MVVM, MVC, BLoC, Redux, Dependency Injection

Domain Expertise: Networking Applications, Device Management, IoT Systems, Video Surveillance (ONVIF, RTSP)

Other Skills: Memory Management (ARC), Auto Layout, Unit Testing, UI Testing, Agile Methodologies, CI/CD, Accessibility (a11y)

Education

Sal College of Engineering

Aug 2019 – June 2022

B.Tech (Bachelor of Technology) in Information Technology

Government Polytechnic Ahmedabad

Aug 2016 – June 2019

Diploma in Information Technology
